

CORE FEATURES

One CRM for your whole recruitment desk.

CTC People's ATS & CRM moves candidates, clients and jobs through a single pipeline — from first application to placement, timesheet and invoice — configurable to how your desk actually runs, whatever you're placing.

Everything your desk needs — none of it rigid.

Job posting, compliance, documents, rostering, placements, payroll, invoicing and reporting all run on the same record set — and every rule, form and field is configurable to how your team already works.

01

Job & Advertising

Manage all aspects of a Job from one central point. Advertise to external job boards or your websites.

02

Candidate Search — List & Map

Search on resume, candidate detail, skills, availability and radius. View list or map.

03

Compliance & Credentialing

Required documents managed by candidate and placement, with a dynamic list by job.

04

Document Generation & E-Sign

Forms, PDFs and signatures, natively — no separate tool required.

05

Roster & Shift Management

Build rosters centrally — or let inbound emails create shifts on their own.

06

Placement & Timesheets

Online confirmation from placements, with timesheets generated automatically from confirmed shifts.

07

Payroll

Rate cards, penalty rates, super and on-costs, calculated automatically for PAYG candidates.

08

Finance & Invoicing

Invoices generated automatically on approved placements or timesheets, integrated with your finance system.

09

Reports & Dashboards

Fill rate, compliance and revenue, visible in real time — no separate BI tool.

See it running against your own desk.

Book a walkthrough configured around how your desk actually runs — not a generic demo.
